***ENGINEERED SYSTEMS...MAXIMUM EFFICIENCY***

**073 768 1567 • [www.capstoneengineering.co.za](http://www.capstoneengineering.co.za)**

## **STANDARD WARRANTY**

### **ROTARY VANE VACUUM PUMPS**

Capstone Engineering (Pty) Ltd only covers parts/products under the warranty scheme below; labour, travelling, accommodation and any loss incurred through machine failure or parts there-of will not be covered by the warranty. Clients need to be aware of, and account for risks involved in not having suitable back-up air-compressors, and/or parts, in the event of failure. In the event of any mechanical failure, any and all machines bought through Capstone Engineering (Pty) Ltd should be brought back to Capstone Engineering (Pty) Ltd premises for assessment – all transport will be for Clients account.

Parts and/or items sold by Capstone Engineering (Pty) Ltd not mentioned in the warranty policy will be covered by a standard one-year discretionary warranty. Management reserves the right to refuse a claim on these parts and/or products; claims will be dealt with on a case-by-case scenario.

Capstone Engineering (Pty) Ltd will not offer free of charge service or parts to repair damages due to installation errors, incorrect usage, maintenance errors and use of non-original manufacturer parts. Use of non-original service parts will void all warranties as will late or skipped servicing. Servicing to be done at all times during the life of the machine by an authorised technician.

Equipment offered against the above quotation is subject to a guarantee period of **12 months/1000 running hours**, from date of commissioning, against faulty design, materials and poor workmanship, and fair wear and tear excepted. The warranty covers only parts. Labour, transport and any other cost of repair incurred will not be covered by the warranty. Outside purchased equipment is subject to the guarantee, which the sub-supplier, Air and Vac Technologies, applies to his equipment.
